| Income – DSCR              | General Requirements:    All refinance transactions require the property to be leased. Vacant property not eligible with the exceptions of properties leased through short term rental agencies or on certain Delayed Financing loans (see guides for details).   Property must not be occupied by any member of the borrower's LLC or any family member.   Short Term Rentals:   Defined as properties leased on a nightly, weekly, monthly, or seasonal basis.   ALL STRs require evidence from third party vendor (such as Property Guard, Vrolio or equivalent) validating that the governing municipality where the subject STR is located allows properties to be rented as STRs; with the exception of the five (5) New York City Boroughs (Manhattan, Brooklyn, The Bronx, Queens and Staten Island), which are ineligible for purchase by NQM Funding.   DSCR Calculation Methods and Minimum DSCR:   Option 1: Lesser of 1007/1025 completed using either long-term or short-term market rents – DSCR min 1.00.   OWhen the 1007/1025 is prepared with the use of short-term rentals, the appraiser is required to address the seasonality of the subject property short term rental market in computing the market rent. If the appraiser fails to appropriately address for seasonality, gross rents should be computed using the vacancy factor as determined by the AirDNA Property Earning Report. For example, if the occupancy rate is 60%, a 40% vacancy factor must be applied to the short term rental income from the comparable rent schedule.   O For Long Term Rentals, when the actual rent as documented from the lease exceeds market rents, the higher figure may be used with two months proof of receipt of the higher rental income.   Option 2: 12-month lookback period to determine avg rents or annual or monthly statements from AirBNB or similar service - DSCR min 1.00.   Option 3: AirDNA / Min DSCR 1.15.
